profile

Hi, I am a frontend software development engineer(but want to be a full-stack one day) from Egypt, who love Programming. Developing learning and Problem Solving. I am passionate about taking risks and solving them by Communicating Sharing experience and knowledge.

Education

Internship at Kalbanyan Al-Marsous   *April 2022 – October 2022*

My internship at Kalbanyan Al-Marsous was a valuable opportunity to apply my React.js and JavaScript knowledge in a professional setting, and it has strengthened my foundation in web development.

Bachelor of Laws   *Tanta University*

Bachelor's degree program   *May 2015 – August 2019*

Final grade: 73/90

PERSONAL PROJECTS

Orebistore   🌐 *orebistore.vercel.app*

Project Description: Orebistore is a web-based e-commerce application that I independently developed using React, Tailwind CSS, Firebase for authentication, Redux Toolkit for state management, React Query for data fetching, and React Router DOM for navigation.

- Authentication: authorization using Firebase, ensuring secure access to the application's features.
- State Management: Utilized Redux Toolkit to manage the global state of the application, providing a seamless and efficient user experience.
- Data Fetching: Employed React Query to fetch and manage data from the server, optimizing data loading and rendering.
- Responsive Design: Created a responsive and visually appealing user interface using Tailwind CSS, ensuring a consistent user experience across devices.

Movix4u   🌐 *movix4u.netlify.app*

Project Description: Movix4u is a web-based movie streaming platform that I developed using React, Sass for styling, Redux Toolkit for state management, and React Router DOM for navigation. This project allows users to browse and watch movies by displaying information, trailers

- Movie Data Integration: Integrated the TMDB API to fetch and display movie information, trailers, and actor details dynamically.
- User-Friendly Interface: Designed an intuitive and visually appealing user interface, ensuring an enjoyable and responsive user experience.
- State Management: Leveraged Redux Toolkit to manage the global state of the application, providing efficient data flow and a smooth user journey.
- Responsive Design: Utilized Sass for styling, ensuring the website is responsive and visually appealing on various devices.

Heathyfood   🌐 *heathyfood.vercel.app*

Project Description: Heathyfood is a web-based platform that I developed using React, CSS for styling, and Redux Toolkit for state management. This project allows users to order healthy food items online. It demonstrates my proficiency in web development, including front-end technologies and state management with Redux Toolkit.

- Ordering System: Created a user-friendly interface for users to browse and order healthy food items.
- State Management: Utilized Redux Toolkit to manage the global state of the application, ensuring efficient data flow and a smooth ordering process.
- Styling: Designed the application's look and feel using CSS, ensuring a visually appealing and responsive user interface and the website is responsive, providing a seamless user experience on various devices.

Technical skills

- JavaScript , Typescript , React.js , Next.js
- jQuery , REST APIs , Redux , Redux Toolkit
- react-query ,Style Compone, Sass
- Tailwind CSS , material ui
- HTML5 , CSS3 , Git, GitHub

Soft skills

- Problem-solving
- Communication
- Adaptability
- Teamwork
- Organization

Courses and Certificates:

- Programming Foundations.
- Programming Foundations: Algorithms.
- Programming Foundations: Object-Oriented Design.
- Introduction to Programming Using HTML and CSS Programming.
- React The Complete Guide 2023 incl React Router Redux.
